

Area of Learning: Mathematics		Pre-calculus 11	
Big Ideas		Elaborations	
<ul style="list-style-type: none"> • Proportional comparisons can be made among triangles and angles on a coordinate plane, using trigonometry. 		<ul style="list-style-type: none"> • Proportional comparisons: <ul style="list-style-type: none"> ○ Geometry and Measurement: Proportional reasoning is used to make sense of multiplicative relationships. 	
<ul style="list-style-type: none"> • The meaning of each operation, including rational exponents and radicals, extends to algebraic expressions. 		<ul style="list-style-type: none"> • operation: <ul style="list-style-type: none"> ○ Computational Fluency: Development of computational fluency requires a strong sense of number. 	
<ul style="list-style-type: none"> • Functions allow us to model contextualized situations. 		<ul style="list-style-type: none"> • Functions: <ul style="list-style-type: none"> ○ Patterning: Patterns are used to identify regularities and form generalizations. 	
<ul style="list-style-type: none"> • Operations between algebraic expressions equations are connected and allow us to make meaning through abstract thinking. 		<ul style="list-style-type: none"> • connected: <ul style="list-style-type: none"> ○ Number: Algebraic reasoning is used to describe and analyze mathematical relationships. 	
Curricular Competencies	Elaborations	Content	Elaborations
<p><i>Students are expected to do the following:</i></p> <p>Reasoning and analyzing</p> <ul style="list-style-type: none"> • Use reasoning and logic to analyze and apply mathematical ideas • Estimate reasonably • Demonstrate fluent and flexible thinking of number • Use tools or technology to analyze relationships and test conjectures • Model mathematics in contextualized experiences <p>Understanding and solving</p> <ul style="list-style-type: none"> • Develop, demonstrate, and apply mathematical understanding 	<ul style="list-style-type: none"> • reasoning and logic: <ul style="list-style-type: none"> ○ inductive and deductive reasoning ○ predicting, generalizing, drawing conclusions through experiences including puzzles, games, and coding • Estimate: <ul style="list-style-type: none"> ○ being able to defend the reasonableness of an estimate across mathematical contexts • fluent and flexible thinking: <ul style="list-style-type: none"> ○ includes using known facts and benchmarks; partitioning; applying 	<p><i>Students are expected to know the following:</i></p> <ul style="list-style-type: none"> • powers with rational exponents • radicals operations and equations • real number system • polynomial factoring of the form $ax^2 + bx + c$, $a^2x^2 - b^2y^2$ • rational expressions and equations • quadratic functions and quadratic equations • systems of inequalities • trigonometry, including non-right triangles and angles in standard position <p>financial literacy: investments and loans</p>	<ul style="list-style-type: none"> • powers: <ul style="list-style-type: none"> ○ exponent laws, evaluating, numerical and variable bases • radicals: <ul style="list-style-type: none"> ○ simplifying radicals and operations with radicals, solving simple radical equations • real number: <ul style="list-style-type: none"> ○ classification • factoring: <ul style="list-style-type: none"> ○ a is not restricted to 1 • rational: <ul style="list-style-type: none"> ○ simplifying and applying operations to expressions; solving equations algebraically

<p>through play, inquiry, and problem solving</p> <ul style="list-style-type: none"> • Visualize to explore and illustrate mathematical concepts and relationships • Apply flexible strategies to solve problems in both abstract and contextualized situations • Engage in problem-solving experiences that are connected to place, story, cultural practices, and perspectives relevant to local First Peoples communities, the local community, and other cultures <p>Communicating and representing</p> <ul style="list-style-type: none"> • Communicate mathematical thinking in many ways • Use mathematical vocabulary and language to contribute to mathematical discussions • Represent mathematical ideas in a variety of ways • Explain and justify mathematical ideas <p>Connecting and reflecting</p> <ul style="list-style-type: none"> • Reflect on mathematical thinking • Use mathematics to support personal choices • Connect mathematical concepts to each other and to other areas and personal interests • Incorporate First Peoples worldviews and perspectives to make connections to 	<p>whole number strategies to rational numbers and algebraic expressions</p> <ul style="list-style-type: none"> • Model: <ul style="list-style-type: none"> ○ using concrete materials and dynamic interactive technology ○ representing a situation graphically and/or symbolically • Visualize: <ul style="list-style-type: none"> ○ includes dynamic visualizations such as graphical relationships, simulations • flexible strategies: <ul style="list-style-type: none"> ○ from a repertoire of strategies, choosing an appropriate strategy to solve problems (e.g., guess and check, model, solve a simpler problem, use a chart, use diagrams, role-play) • experiences: <ul style="list-style-type: none"> ○ includes context, strategies and approaches, language across cultures • many ways: <ul style="list-style-type: none"> ○ including oral, written, visual, use of technology • discussions: <ul style="list-style-type: none"> ○ developing a mathematical community in the classroom through discourse — partner talks, 		<ul style="list-style-type: none"> • functions: <ul style="list-style-type: none"> ○ characteristics of graphs (including domain and range, intercepts, vertex, and symmetry), multiple forms, function notation, extrema • equations: <ul style="list-style-type: none"> ○ factoring, quadratic formula, completing the square, graphing (systems?), square root method • systems of inequalities: <ul style="list-style-type: none"> ○ could be limited to linear, or extended to quadratic ○ include domain and range restrictions from contextual problems • trigonometry: <ul style="list-style-type: none"> ○ sine and cosine law, including ambiguous case, angles 0–360, special angles
